About Barista & Co

Your cup of coffee matters to everyone at Barista & Co.

Over the years, Barista & Co has grown but the idea that specialty coffee doesn't have to be complicated remained at the core of what we do. We work around 3 core principles: roast fresh, grind fresh, brew fresh. Our aim is to keep great coffee simple, cut out the jargon and teach everyone how easy it is to brew fresh coffee at home, work and play.

The rest of our story is still being written, thank you for joining us on the journey.

James and Louise

GRIND FRESH

Core All Grind

If you are serious about great coffee a consistent grinder is a must. This electric grinder packs a serious punch often associated with grinders at a much higher price.

At the touch of a button, stale, pre-ground coffee will be a thing of the past. You can give your coffee what it deserves and enjoy better coffee at home. The Core All Grind electric filter and brew coffee grinder is a slimline countertop electric grinder for those who want to raise their coffee game and grind fresh. The hardwearing stainless-steel burr grinder has 40 settings from coarse to fine grind with excellent grind size consistency so you can appreciate fresh coffee your way.

ELECTRIC FILTER AND BREW COFFEE GRINDER

"Bought the grinder - excellent product, it's nice and solid and grinds beautifully consistently on a range of settings. I'm very happy - it feels like a high end product at a mid-range price point."

[Watch The Video](#)

Use with a Portafilter

The included portafilter attachment triggers the grinder when the portafilter is placed in the cradle, to stop simply remove. This feature is designed to be used with pressurised portafilters.

A Grind for Manual Brewers

Designed as a brew grinder it is perfect for filter, pour over, cafetiére and cold brew. The burrs can also be manually adjusted (see video) to grind for stovetop and espresso. The greatest level of grind size consistency can be found between 400 and 800 microns.

Simple and Easy to Clean

Unlike other grinders the burrs are simple to access, clean and replace and even comes with a brush cleverly stored in the hopper. There is no need for tools and complex instructions, with the press of a button the burrs can be removed and replaced in a couple of seconds.

Consistently Excellent Coffee

The 29mm stainless steel burrs provide excellent grind size consistency ensuring even extraction when brewing. They are powered by a powerful DC motor that has a grind speed of 415 rpm reducing the harmful impact of heat on the coffee while still being quiet for use at home (approximately 75db).

Grind on Time or Weight

The grinder has automatic 10 second increments (up to 50 seconds) as well as a manual on off button if you want to grind based on time. For those who grind on weight the removable hopper has been designed with a coffee shut off opening so it can be placed on scales and then put back on to the grinder without any spillage.

Keep Coffee Fresh

The UV protected storage bean hopper holds up to 240 grams of whole bean coffee and can be removed with a simple twist. The included ground coffee container has a capacity of 110 grams and is also UV protected with a silicone stopper for storage.

BREW FRESH

51% of people choose the wrong coffee maker. With one simple question, we want to change this.

How do you like your coffee?

We developed a simple guide based on consumers coffee preferences and the coffee maker they need. No dark arts, we just ask them.

Did you know?

The way you make it is just as important as the coffee you use.

Brew It Stick

The original coffee infuser. The award-winning Brew It Stick has been specifically designed for those who want the convenience of instant coffee but the taste of fresh coffee

This one cup coffee infuser allows everyone to enjoy freshly brewed coffee in as little as 5 minutes with no mess.

NEW

Hassle Free and Simple to Use

Similar in concept to a tea infuser with a 360° filter all you have to do is add coffee to the basket, put in your cup of hot water and give it a stir and twist before leaving to brew.

Entry to Brewing Fresh

The perfect way to start brewing fresh or as a secondary brewer for the home, office or outdoors as the brew basket holder means no mess coffee.

No Mess

The wide neck basket has been designed to use with a teaspoon so it is easy to add coffee and the handy holder means there are no drips on your desk or surface when your finished.

You Control the Strength

Positioned as a lower strength coffee maker for those who do not like it too strong; to increase the strength you can stir, twist and brew for up to 8 minutes.

Use any Filter Coffee

Like cafetiere coffee presses the Brew It Stick has been designed to use a medium to coarse ground coffee that is widely available.

Durable and Reusable

Designed and manufactured in the UK with durable recyclable plastic the handle and basket are dishwasher safe, unlike paper filters the stainless steel filter can be used again and again.

LIFE IS FAST POUR SLOW

"Purchased the one brew for a gift for a coffee lover - and it's gone down a treat"

"Lovely design and does a good job of brewing, would recommend to anyone"

[Watch The Video](#)

One Brew

The 4 in 1 coffee and tea maker. Inspired by the professional specialty coffee technique of allowing gravity to move the coffee to the bottom of an immersion brewer, such as a coffee press and then pouring slowly.

The One Brew is a new way to brew and was developed to make gravity brewing easy so the user can enjoy a cleaner and more complex flavour of a cafetiere coffee press without any hassle.

Simple to Use

Designed as a single serve coffee maker so you always brew fresh the One Brew has the same capacity as a standard 3 cup (350ml / 1 Mug) cafetiere, all you have to do is add medium or coarse ground coffee, leave to brew, insert the filter and pour, no need for a press filter.

Four Brewers in One

The medical grade stainless steel filter and silicone seal means that the One Brew is incredibly versatile and can be used at home, in the office or camping for cold brew, hot coffee, loose leaf tea and even iced tea, all without the need for paper filters.

Better than Cafetiere Coffee

By allowing your coffee to brew and settle for 6 minutes you will get more flavour from your coffee. Then follow the signature slow pour for 25 seconds and you can enjoy a cleaner coffee without losing the velvety texture associated with cafetiere coffee press coffee.

Easy To Clean

The filter lid has an angular shape so when finished it can be removed and held to collect the grounds in or placed upside down in the sink to allow the water to drain from the used coffee before being disposed of or composted.

Protected from Knocks

The silicone base protects your surface and the coffee maker from breakage and the BPA free materials are all reusable, recyclable and dishwasher safe while the thermal shock resistant borosilicate glass is easy to clean and won't taint the flavour of your favourite coffee.

**100%
PLASTIC FREE**

"This made a lovely gift as recommended in an online article for the best eco-friendly coffee press. It is stylish and easy to use"

Core Coffee Press

A modern classic. Step into the known for those who love the velvety texture of press coffee.

Made only from stainless steel and borosilicate glass, the Core Coffee Press is the choice for those who are looking for a plastic-free coffee maker.

Excellent Velvety Coffee

The optimum micron level reusable stainless-steel filter ensures a thick and velvety coffee with a heavier body associated with cafetiere coffee press coffee and allows the application of a second filter (sold separately) for those who enjoy a lighter body.

The Sustainable Choice

Made only from high grade 304 stainless steel and thermal shock tested borosilicate glass the design is plastic free and spare parts are available if accidents happen.

Ergonomic and Easy to Clean

The large glass handle has been designed to be comfortable to hold when full and the Barista & Co statement knob offers greater stability when plunging and allows the filter to be removed easily for cleaning.

Protected from Knocks

The stainless-steel base protects the glass from breakage while being removable so the glass beaker can be placed in a dishwasher leaving the frame to be washed by hand.

Pours from Any Angle

The medical grade stainless steel flow filter will not taint the flavour of coffee and the unique 360 degree design ensures the pour is controlled without having to align the filter to the pouring spout.

BREW BEAUTIFUL

Core Pour Over

There can be little doubt preparing the perfect pour over takes a little care and attention but the reward is a moment to take pride in the brew you are making by hand.

The Core Pour Over was designed to achieve the optimum flow rate to give a balanced cup of coffee through even extraction.

Better Tasting Coffee

Pour over coffee is the go-to brewing method for baristas across the world when they want to make a complex yet affordable coffee. The Core Pour Over reduces the contact between the brewer and the paper filter (sold separately) to optimise the flow rate for a clean, balanced and consistently excellent coffee.

Simple & Easy to Use

Compatible with size 2 cone filter papers (e.g. V60) all you have to do is put the paper filter into the brewer, add your coffee, pour over your hot water and leave to drip through. When you are finished you can discard the compostable materials, give a quick rinse and go again.

Versatile for Various Sizes

The Core Pour Over allows you to change many variables for your coffee from grind size, water temperature and water volume so you can find your own optimum brew whether that is a light or velvety. You can also control the amount of coffee you make with the ability to make up to 4 cups.

Lightweight, Rust Resistant & Durable

Made from premium ironline metal the brewer is sturdy enough to be used on a large glass serving jug while the easy view design means you can also use it on a single mug or cup while observing the fill level.

Easy to Grip

The easy grip handles can be used to flatten the bed of the coffee before or during brewing or to agitate (move) the coffee for an even extraction. They also allow the brewer to be removed after use without being too hot to hold.

SHORT STRONG COFFEE

"It makes a great cup of coffee and is easy to use anywhere. We love to take ours camping"

"So easy to use followed the very well explained instructions and it makes a fabulous cup of coffee"

Strong Brew

The Strong Brew is a compact coffee maker that will change the way you drink coffee.

A great way to get a strong but quick shot of caffeine at home without the fuss or expense of an espresso machine

It combines pour over, immersion and pressurised brewing methods to deliver a quick, clean and outstanding short black coffee. A great way to get a strong but quick shot of caffeine before getting active.

Perfect if you like strong coffee but not espresso.

[Watch The Video](#)

Strong, Short or Long

The compact chamber produces a short black coffee that can be enjoyed straight up or used as a base for milky coffees. The concentrated coffee can be made long by adding hot water for an Americano style coffee.

Stable and Consistent

The BPA free patented helix design means that unlike other brewers the Strong Brew applies little or no pressure on the cup or jug you are brewing into and ensures you have no spills and a consistent plunge which gives a better tasting coffee through even extraction.

Perfect for Travel and Small Spaces

The compact design weighs in at only 250g and takes up less space than a standard water bottle and comes with a storage compartment (for papers) so you can enjoy fresh coffee wherever the journey takes you.

Coffee Your Way

As an extremely versatile coffee maker you are able to play with grind size, amount of coffee, brew time and water temperature as well as choose from paper or metal filters; paper filter (100 included) for a cleaner brighter cup or a reusable and sustainable metal filter for a heavier velvety cup (metal filters sold separately).

BREWED TO LAST

NEW

Core Press Stainless Steel

A classic coffee maker that is designed to last the test of time. The handcrafted insulated stainless steel body comes with a 10 year guarantee. The perfect mix of performance, durability and design.

The Core Stainless Steel coffee press is the culmination of 3 years of product testing to create the ultimate coffee press. The double-walled body offers unprecedented heat retention and the rubber base prevents slips and protects kitchen surfaces. A fine filter means a cleaner coffee and the silicone plunger design means no metal on metal scratching.

Excellent Velvety Coffee

The stainless steel filter reduces the number of fines for a cleaner cup but retains flavour for a thick and velvety coffee. The silicone filter edge ensures a smooth and consistent plunge without any scratching on the metal internal body.

Retains Heat

The 304 medical grade double-walled insulated stainless steel body ensures that any coffee left in the jug can be enjoyed hot for your second serve. It also makes the perfect jug to use as a partner for a pour over coffee maker.

Long Lasting

The durable body comes with a 10 year guarantee and the rubber base provides stability and will protect your surfaces from damage.

The Perfect Pour

The spout and filter have been designed for a controlled pour from any angle and the ergonomic handle ensures comfort when in use and does not retain heat so it's never too hot to handle.

SLOW POUR COFFEE

NEW

Two Brew

We believe time is something that should be valued. The new Two Brew is a gravity brewer that uses time to deliver a velvety coffee inspired by specialty brewing.

A step up from the original One Brew, the Two Brew has a larger capacity and a new 360 degree stainless steel filter. The double walled stainless-steel body will keep your coffee or tea warm and comes with a 10 year guarantee. Life can be fast, take time to pour slow.

Easy to Use

Simply add coffee (or tea), water and leave to brew. By using gravity and time, all you need to do is enjoy the slow pour and your cup of coffee. A quick rinse and you are ready to brew again.

Four Brewers in One

The 360 degree medical grade stainless steel filter and silicone seal means that the One Brew is incredibly versatile and can be used at home or in the office for cold brew, hot coffee, loose leaf tea and even iced tea, all without the need for paper filters.

Hot and Hard-Wearing

The double-walled insulated stainless steel body will keep your drink warm so it is just right when you are ready to drink. The 10 year guarantee means you can enjoy your favourite coffee for years to come.

Protects Your Hand and Surfaces

The ergonomically designed handle remains cool when in use and the rubber base prevents scratches on home surfaces and creates stability to help against spillages.

MASTER OF MILK

BARISTA & CO x Dhan Tamang

The Barista Pro Pitcher

In the last 7 years we have designed and developed 18 milk pitchers and sold over 100,000 for home and professional use but we are always striving to improve or offer something that brings benefit to the end user.

[Watch The Video](#)

NEW

We have collaborated with Dhan Tamang, a 6x UK latte art champion and world finalist on this new milk pitcher range. From bending his own jugs ready for composition, we have worked closely with Dhan to bring to life what he sees as the perfect milk pitcher.

Product Development

The 3D scan we took of Dhan Tamang's milk pitcher was unlike anything we'd see on the market for at-home and professional baristas. With a custom spout, welded handle and unique shape we know this is the pitcher that the winner of the next Latte Art Championships will be using.

BARISTA & CO x Dhan Tamang

Custom Logo

The New Pro Pitcher is also available for custom logo application with detailed laser etching.

Express your brand identity and help your business stand out from the crowd and stay top of mind.

SHAKING THAT THING

Core Cocoa Shaker

It is time to upgrade your essential barista tool so you can add that indulgent touch of chocolate.

The new Core shaker has been made larger while still being comfortable to hold in your hand. Available in muted matte black and white it is unassuming while adding a hint of style to your coffee shop or kitchen.

NEW

Controlled and Even Dusting

The fine stainless steel mesh allows a controlled and even distribution of cocoa powder when being used to top steamed milk on a cappuccino or hot chocolate.

Ergonomic Design

Designed to fit perfectly in your hand when sprinkling chocolate, cinnamon or even icing sugar. The new matte finish is easy to grip while in use or when removing the screw fit lid to refill.

Easy to Clean

The uncoated medical grade stainless steel inner is easy to clean with warm water and the wider neck allows the internal body to be cleaned with a brush.

Keep it Fresh

The plastic lid ensures that the contents is protected from moisture ensuring a longer shelf life and reducing wastage at home or in a commercial environment.

BE MEASURED

Scoop Spoon

This spoon has been specially designed and developed to improve the functionalities of a traditional measure spoon.

Featuring a unique 'scoop' that simply allows you to measure out a teaspoon or tablespoon. It is shaped so that grounds will pour smoothly when you are using with scales for precise measuring and the long handle allows you to easily reach into coffee bags.

Easily Measure and Serve Coffee

The unique scoop design and tapered edge makes it easy to measure coffee or any food stuff directly from the bag first time.

Non Slip Handle

The extended handle allows you to reach the bottom of a bag and the soft touch silicone sleeve makes it comfortable to hold when using with weighing scales for precision measurements.

Internal Measure Marks

6ml teaspoon and 15ml tablespoon marks that are perfect for approximate measurement of powders or liquids.

Rust Resistant Stainless Steel

Up to 5mm thick 18/8 food safe medical grade coated stainless steel that is long lasting and durable. It's contrasting brushed and gloss electroplated finish makes the Scoop Spoon a luxurious accessory.

Packaging

As part of our environmental commitment we have redesigned all our packaging for 2022 and removed all single use non-recyclable materials from everything that we do.

All our brewers now come with a colour coded strength guide from lower strength light yellow (1) to higher strength orange (3). Used in conjunction with our QR code product quiz it helps customers to choose the right product for them. All brewer packaging also include QR code to show the product in use.

- Full recyclable packaging
- No more single use polybags
- Printed using natural soya ink
- Drop tested for eCommerce
- Electrical items packed in ready-to-ship cartons
- Coffee maker packaging includes a consumer strength guide
- QR codes for product videos
- Campaign messaging and product features

Our new packaging will be on all our factory shipments from May 2022

Custom Print

At Barista & Co Coffee we offer custom print and laser etching on a wide range of our award-winning products.

Our products can be personalised for you to sell within your business or with corporate logos to be given as gifts. Express your brand identity and help your business stand out from the crowd and stay top of mind.

For larger orders we can create gift sets that meet your specific requirements and budget and provide gifts people want to keep and use.

B&Co Apparel

Our organic cotton t-shirts are a nod to the way we want our coffee to be enjoyed and our customers to feel.

That sunny Sunday morning feeling when it is green lights all the way. They are soft, comfortable and sustainably made, the perfect partner for good times.

Offered as promotional items for our retail and distribution partners.
